

Contents

Editorials

701 Simpson's paradox: how performance measurement can fail even with perfect risk adjustment
P J Marang-van de Mheen, A G Shojania

706 After Mid Staffordshire: from acknowledgement, through learning, to improvement
G P Martin, M Dixon-Woods

Viewpoints

709 Deafening silence? Time to reconsider whether organisations are silent or deaf when things go wrong
A Jones, D Kelly

714 'Between the flags': implementing a rapid response system at scale
C Hughes, C Pain, J Braithwaite, K Hillman

Original research

718 Validation of a teamwork perceptions measure to increase patient safety
J R Keebler, A S Dietz, E H Lazzara, L E Benishhek, S A Almeida, P A Toor, H B King, E Salas

727 The frequency of diagnostic errors in outpatient care: estimations from three large observational studies involving US adult populations
H Singh, A N D Meyer, E J Thomas

732 A multicentre cohort study assessing day of week effect and outcome from emergency appendicectomy
H JM Ferguson, N J Hull, A Bhangu, on behalf of the National Surgical Research Collaborative

September 2014 Volume 23 Issue 9

741 Contribution of hospital mortality variations to socioeconomic disparities in in-hospital mortality
Y Kim, J Oh, A Jha

749 Dissemination of a simulation-based mastery learning intervention reduces central line-associated bloodstream infections
J H Barsuk, E R Cohen, S Peris, H Demo, S Gupta, J Feinglass, W C McGaghie, D B Wayne

757 An observational study: associations between nurse-reported hospital characteristics and estimated 30-day survival probabilities
C Tweed, J S Setna, J Helgeland, G Bukholm

765 Identifying systems failures in the pathway to a catastrophic event: an analysis of national incident report data relating to vinca alkaloids
B D Franklin, S S Panesar, C Vincent, L J Donaldson

Narrative review

773 Computerised provider order entry combined with clinical decision support systems to improve medication safety: a narrative review
S R Ranji, S Rennie, R M Wachter

Research and reporting methodology

782 Differences in case-mix can influence the comparison of standardised mortality ratios even with optimal risk adjustment: an analysis of data from paediatric intensive care
B N Manktelow, T A Evans, E S Draper
